

Güteschutz Beton

Certificate for usability

(Reg.-No. 5014.7.90-1)

According to the monitoring and certification regulations by the Güteschutz Beton (ÜZO), part 7, this certificate is valid for the following construction products

Finished parts made of concrete, reinforced or prestressed concrete as per the harmonised product standards for load-bearing applications

- product group 6.30 -

of the manufacturing company

HOG SLAT SP. O.O
ul.Stefana Batorego 126 PL-62-080 Batorowo

As recognised authority as per article 43 of the construction products regulation, we certify that construction products above comply with the

Administrative regulation technical construction regulation paragraph A 1.2.3 and appendix ABUG

and the documents of requirements in place for the products (see www.abid-bau.de). An independent assessment was completed based on the national technical construction regulations / introduced technical rules. In addition to the System 2+ for the assessment and control of the constancy of performance, a continuing, voluntary external monitoring as per DIN 18200 and ÜZO part 7 is performed by the Güteschutz Beton.

Thus, the construction products undergo regular independent material testing, while at the plant, the raw materials, concrete production and processing, production processes, staff qualification, documentation of the internal production controls, supply documentation including public image, and the labelling of products is tested.

The products comply with the accepted engineering standard and are suitable for use in Germany. The manufacturer is allowed to mark the construction products with the quality labels according to no. 010380756 OAMI/OHIM [Office for the Harmonisation of Internal Markets].

The validity of this certificate can be checked by scanning the QR code.
